

Multi-Agent Code Review System

Maharshi Soni | multi-agent | advanced

Description

Multi-agent system with specialized agents (Security, Performance, Style, Orchestrator) collaborating via message-passing architecture for comprehensive code reviews.

Tech Stack

pydantic, click, rich, pytest

Features

- Four specialized review agents
- AST-based code analysis
- Message-passing architecture
- Priority-based finding aggregation
- Rich terminal output
- Configurable review profiles

Sample Input

Python files to review

```
python -m src.cli review src/ --profile thorough
```

Sample Output

Code review findings

```
CRITICAL: eval() usage at line 15 (SecurityAgent)
```

Project Files

```
.gitignore
